

Laboratorios Inibsa Selects TrackWise Digital to Accelerate Its Digital Quality Journey

Leading global manufacturer of local anesthetics to implement digital QMS to standardize and unify quality, complaints, document and training management

HAMILTON, NJ—APRIL 29, 2021—Today, Sparta Systems announced that Laboratorios Inibsa, a leading provider of medicines and health care products headquartered in Barcelona, Spain, has selected TrackWise Digital® as its next-generation quality management platform. Inibsa will be consolidating its existing systems into a single unified platform incorporating Quality, Complaints, Document and Training Management, enabling the company to take advantage of the benefits of cloud technology alongside new capabilities available in TrackWise Digital.

“We needed to replace our obsolete document management system which presented us with the ideal opportunity to consolidate our quality, document and training processes under a single digital platform to support all our business needs, now and in the future,” said Miquel Esteban, Inibsa IT Project Manager. “As a happy existing user of TrackWise on-prem software, it made perfect sense to migrate to the TrackWise Digital solution suite, seamlessly integrating quality, document and training management to create new operational efficiencies. For example, we will now be able to manage and control GMP documents throughout the entire quality lifecycle, while automating training tasks associated with each documentation release.”

Another key factor in Inibsa’s selection of TrackWise Digital was its close working partnership with Sparta’s channel partner for Spain, TDV. “Having the support of our trusted long-time partner TDV will be critical as we look to migrate, simplify and integrate quality related processes and data into this new digital eco-system,” said Esteban.

Sparta Vice President of Digital Innovation, Stephen McCarthy, said, “Like many of our customers, Laboratorios Inibsa is at a pivotal point in its quality organization’s maturity, where digital transformation presents an immediate opportunity to modernize its QMS strategy. With TrackWise Digital, Inibsa can accelerate its digital quality journey on a robust yet agile cloud-based QMS platform, while ensuring efficient compliance and continuing to meet the highest quality standards.”

About Inibsa

Inibsa is a pharmaceutical company based in Barcelona with more than 70 years of experience in the market. We are providers of products and services to health professionals in the Dental and Medical fields. Our flagship companies have enabled us to become a reference in Spain and Portugal, and sell our products in more than 60 countries.

Over the last years, the latest technologies in the market have been incorporated into the manufacturing process and quality control in order to strengthen our leadership as specialists in

Honeywell

our field. All this makes Inibsa a group that is competitive, sustainable, committed, and oriented towards innovation and internationalization.

Inibsa is the 2nd largest manufacturer of dental cartridges worldwide. It also has a subsidiary in Portugal called Laboratorios Inibsa Portugal.
